## Research Doc

### Lab 6 Billiards

Billiards is played with a red ball been placed on a certain spot and 1<sup>st</sup> player takes their 1<sup>st</sup> shot. only 2 balls are on the table at the start with the other cue ball added for the 2<sup>nd</sup> player.

#### Scoring

- A cannon scores 2 points. This is when the one of the cue balls hits off another cue ball and the red ball in one shot.

- A Hazard (in/off) off the white is 2 points and off the red is 3 points. The term in/off means to "scratch" in U.S. terms, you cannon the cue ball off the other ball and into a pocket.

- Potting the white is 2 points, potting the red is 3 points.

These scoring methods can be combined.

#### Spitting Balls

The red ball is spotted after being pocketed. If the white ~~pot~~ is pocketed it remains off table until the turn changes. If the cue ball is made on a hazard the player takes the ball in the hand in the D.I.
